## Data visualization projects

*Stephen Hawking Career*, March 2018, michael.szell.net/hawking

A Science of Science tribute to Stephen Hawking. This interactive plot allows the exploration of the influential physicist’s oeuvre – scientific papers and books – and its impact.

*What the Street!?*, June 2017, whatthastreet.moovellab.com

An online platform for intuitive and playful exploration of wasted mobility space in cities, of uneven distribution of space between different modes of transportation, and of how, in future scenarios of widespread shared and autonomous vehicles, massive areas of parking spaces could be regained for the public.

*HubCab*, Mar 2014, www.hubcab.org

An interactive visualization that invites you to explore the ways in which over 170 million taxi trips connect the City of New York in a given year. This interface provides a unique insight into the inner workings of the city from the previously invisible perspective of the taxi system with a never before seen granularity.

*Tweet Bursts*, Feb 2014, senseable.mit.edu/tweetbursts

Visual exploration of our collective excitement towards major events: The more excited we are, and the more intense the flurry of messages in the collective, the shorter our messages become.
